

## HS UASI Interoperability Equipment 2008

4/20/2009 - 7/24/2009

Grant Applicant	Project Title	County	\$ Federal	Project Description
Racine Fire Department	VHF Radio Interoperability Project	Racine	\$252,978	This grant will complete the remainder of a program started in 2005 to equip all Racine County Fire Departments with the ability to communicate on VHF Radio Interoperability Frequencies. Radio interoperability will be established on all MABAS, MARC, VCALL / VTAC, and WISPERN frequencies.
Washington County Emergency Management	UASI Interoperability Equipment 2008	Washington	\$266,000	This grant will provide for the purchase of communications equipment, including repeaters and gateways, which will improve communications interoperability in the UASI area. This will improve regional and statewide emergency response capabilities by supporting the priorities identified by the Milwaukee Urban Area Security Initiative in the UASI FY 2008 Spending Plan.
Waukesha County Emergency Management	Waukesha County Communications Interoperability	Waukesha	\$50,000	This grant will allow for the purchase of an ACU-1000 (or equivalent) cross-banding interface for placement in the Waukesha County Mobile Command Post. This equipment will allow users on various networks or systems to be interconnected.
